11110 Brandy Oaks Way

Chesterfield, VA 23832

CORE COMPETENCIES

- **Custom application development** — web platforms, internal business tools, member and customer portals, mobile applications
- **Legacy modernization** — migration of aging .NET, DNN and on-premises systems to supported modern frameworks and cloud hosting
- **Applied AI integration** — document intelligence and data extraction, semantic search, automated reporting and briefings, workflow automation
- **Data conversion and document digitization** — image processing, OCR, structured extraction from unstructured records
- **Accessible web development** — built to WCAG 2.1 AA, the standard required of state and local government sites under ADA Title II
- **Systems integration** — APIs, e-signature, payment processing, third-party platform connections
- **Hosting, maintenance and support** — ongoing updates, security patching, recurring support agreements

DIFFERENTIATORS

- **You work with the people who build it.** No account layers, no offshore handoff, no rotating staff. Principals write the code.
- **Nineteen years, and clients who stayed.** Several relationships exceed fifteen years. Support does not end at launch.
- **Cost-first AI discipline.** We price AI against the process it would replace *before* building it, at real volume. When ordinary code is cheaper, we say so and build that instead.
- **Enterprise architecture on call.** A principal data and AI architect advises Red Barn on large-scale AI, data governance and cloud engagements.
- **Sized for small awards.** Micro and small certified, P-card accepted, and structured to deliver work that larger integrators will not quote.

PAST PERFORMANCE

ZEISS — zeisspoints.com	Dealer loyalty and rewards platform for a global sports optics manufacturer. Multi-year engagement spanning a corporate separation and platform transition.
National School Transportation Association	National association web platform and public information site for the school bus industry. Long-term hosting and support.
FishingCreek Transportation	Driver onboarding and compliance platform — digital forms, e-signature, credential tracking for a regulated pupil transportation contractor.
Chicago's Pulse	Registration and scheduling platform for CPR and first aid certification courses, replacing a manual signup process.
SchoolBusHero.com	Red Barn product — driver recruitment and credential tracking SaaS. 216,000+ annual search impressions, 21,000+ users since 2022.
JacksView.com	Red Barn product — AI document intelligence. Reads receipts, warranties and inspection reports using computer vision, extracts structured data, and provides summaries and semantic search.
